SECTION III - HAZARDS IDENTIFICATIONS**EMERGENCY OVERVIEW:** Dust extremely irritating to respiratory tract. Gas irritating to eyes and respiratory tract.**POTENTIAL HEALTH EFFECTS:****INHALATION:** Fumes and/or dust moderately irritating to eyes and respiratory tracts.**EYE CONTACT:** Fumes and/or dust cause eye irritation.**SKIN CONTACT:** No hazard in normal industrial use. Exposure to hot material may cause thermal burns.**INGESTION:** No hazard in normal industrial use. Irritating to mouth, throat and stomach.**CHRONIC:** Overexposure may cause lung damage.**CARCINOGENICITY:** LISTED IN NTP? No IARC? No OSHA Regulated? No

SECTION IV - FIRST AID MEASURES

- INHALATION:** No specific treatment is necessary since this material is not likely to be hazardous by inhalation. If exposed to excessive levels of dusts or fumes, remove to fresh air and get medical attention if cough or other symptoms develop.
- EYE CONTACT:** Immediately flush eyes with plenty of water. Get medical attention if irritation persists. If exposed to fumes or vapors, flush eyes with large amounts of water for at least 15 minutes.
- SKIN CONTACT:** Remove contaminated clothing. Wash skin with soap and water. Get medical attention.
- INGESTION:** Swallowing less than an ounce will not cause significant harm. For larger amounts, do not induce vomiting, but give one or two glasses of water to drink and get medical attention.

SECTION V - FIRE FIGHTING MEASURES

- Flashpoint (Method):** Non-flammable material.
- Flammable Limits:** Lower: NA Upper: NA
- Autoignition Temperature:** NA

- GENERAL HAZARD:** Material will not burn. During a fire, irritating and highly toxic gases may be generated by thermal decomposition or combustion.
- FIRE FIGHTING INSTRUCTIONS:** As in any fire, wear self-contained breathing apparatus (pressure-demand, MSHA/NIOSH approved or equivalent) and full protective gear.
- EXTINGUISHING MEDIA:** Use dry sand or earth to smother fire.
- HAZARDOUS COMBUSTION PRODUCTS:** Smoke, oxides of carbon, copper, and phosphorous.

SECTION VI - ACCIDENTAL RELEASE MEASURES

- LAND SPILL:** Vacuum or sweep up material and place in a disposal container. Collect scrap for remelting. Do not flush into sewer.
- WATER SPILL:** Collect and place in chemical waste container for disposal.

SECTION VII - HANDLING AND STORAGE

Wash thoroughly after handling. Minimize dust generation and accumulation. Avoid contact with eyes, skin, and clothing. Store in a cool dry place.

SECTION XVI - OTHER INFORMATION

Brazing rod or wire is a non-hazardous solid at ambient temperature. Hazards, as defined by OSHA 29 CFR 1910.1200, may result from fume or dust generated during brazing. The composition and quantity of both are dependent upon the metal being brazed and the procedures being used. Other conditions which influence the hazards associated with brazing include the filler material, the coatings on the metal, the number of people being exposed, and the quality of the ventilation. It is recommended that the composition of the fumes, gases, and dust to which the workers are exposed be classified by sampling the air in the worker's breathing zone and performing a hazard evaluation. See ANSI/AWS f1.1 available from the American Welding Society, P.O. Box 351040, Miami, FL 33135.
