## **SURELOK™**

**Torches and  
Consumable Parts**

Introducing the New Standard in Plasma Torches featuring our new SureLok™ electrode design.

# SURELOK™

The innovative, new SureLok™ torch brings a new level of performance to plasma cutting. SureLok™ has a patent pending electrode locking system permitting quick, precise changes of consumable parts with no tools required. This new design provides more efficient cooling of the torch head and parts, resulting in electrode life that is superior to previous electrode designs.

The new SureLok™ technology is paired with proven Thermal Dynamics® torch designs to produce our most efficient and low cost torch to date. The SureLok™ torch features the same ergonomic handle and heat resistant leads that make our PakMaster™ XL Plus torches so durable. The light, compact design results in maximum arc visibility and excellent operator control for precision plasma cutting.

## New SureLok™ Products

The SureLok™ torch is available as a Replacement Plasma Torch in both hand and mechanized configurations. SureLok™ can be used with a wide range of other manufacturers' plasma units. Consumable parts are also available to support your cutting needs from gauge metal to over 1 inch thick material . . . for both cutting and gouging. Parts are rated at 40, 60, 80 and 100 amps to give you the correct parts for outstanding plasma performance across the application spectrum.

SureLok™ Hand Torch

SureLok™ Automation Torch

## Features Include

- New Innovative Lock-In Electrode
- New 1 Year Warranty
- New & Improved Parts Life Providing Lower Operating Costs
- New Tough, Heat Resistant Leads
- New Machine Torch with Fiberglass Mounting Tube / 32 Pitch Rack
- Ergonomic Torch Handle for Improved Comfort & Less Fatigue
- Maximum Arc Visibility
- Excellent Gouging Capabilities
- Consumables from 40-100 amps

See your Thermal Dynamics® Distributor for a SureLok™ torch to match your plasma cutting needs.
