# SAFETY

We understand that a job well done is important. But we also understand that working safely is important to you and your family. That's why Victor Cutskill has patented safety features built-in to the torch handles in all Victor outfits.

## There's No Substitute For Victor Built-In Safety

Hose connection housing threaded into separate back body block forging - easily replaced

Replaceable built-in reverse flow check valves

Replaceable built-in flashback arrestors

Threaded inner and outer tube design

Heavy inner and outer tube design

Threaded and compression design

## VICTOR CUTSKILL 250 HANDLE

### A NEW DIMENSION IN OPERATOR SAFETY!

Victor Torch Handles are available with VanGuard™ safety features:

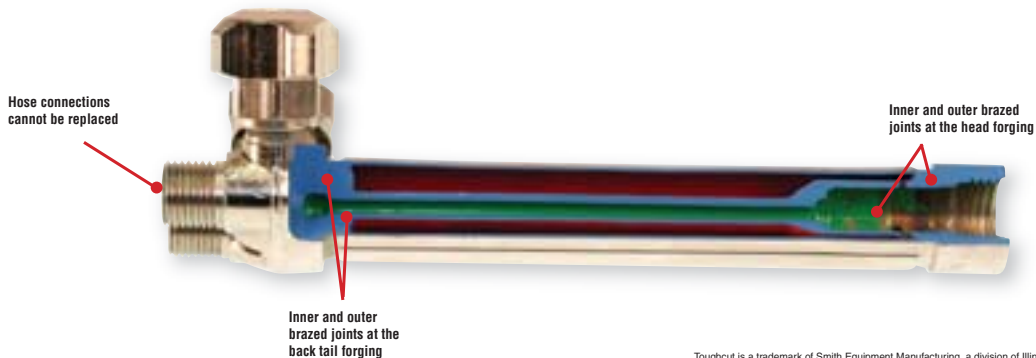

- Built-In Flashback Arrestors
- Built-in Reverse Flow Check Valves
- Therefore there is never a need for accessory reverse flow check valves or accessory flash arrestors.

VanGuard™ Torch Handles are offered in Heavy-Duty and Medium-Duty models, and available in all of Victor's outfits. VanGuard™ Torch Handles also feature Victor Traditional threaded assemblies for quick economical repair if service is necessary.

# COMPARE TO...

## SMITH EQUIPMENT TOUGH CUT HANDLE

Smith Equipment Toughcut handles do not include built-in flash arrestors or check valves. The only parts of the Smith handle that can be replaced are the valves - the handle itself cannot be repaired.

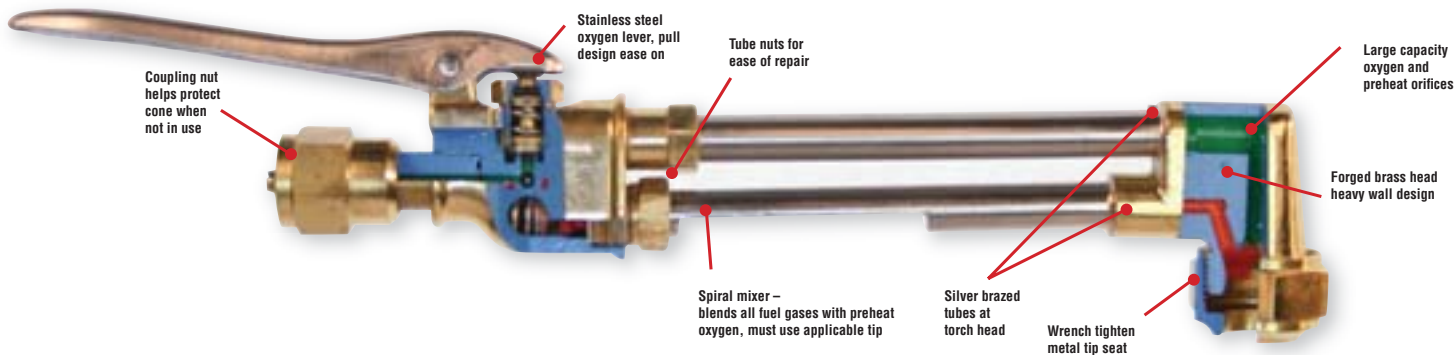

# PERFORMANCE

Field proven since 1913, Victor continues to set the industry standard that can only be imitated, but never matched. Every piece from tips to regulators is built to handle the toughest, most demanding job sites. And now, every component is housed in an attractive toolbox that keeps your outfit protected and organized.

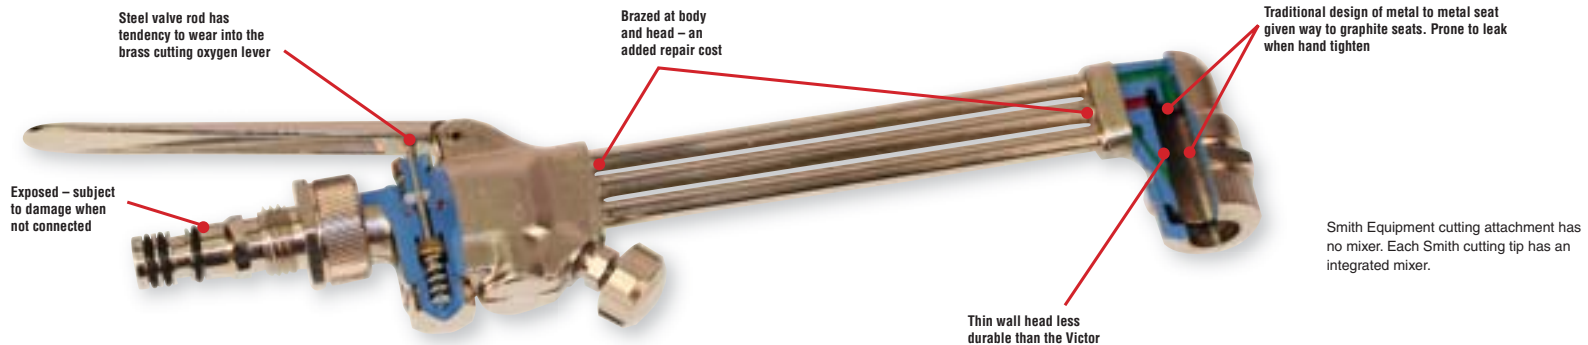

## Built-In Performance

# DURABILITY

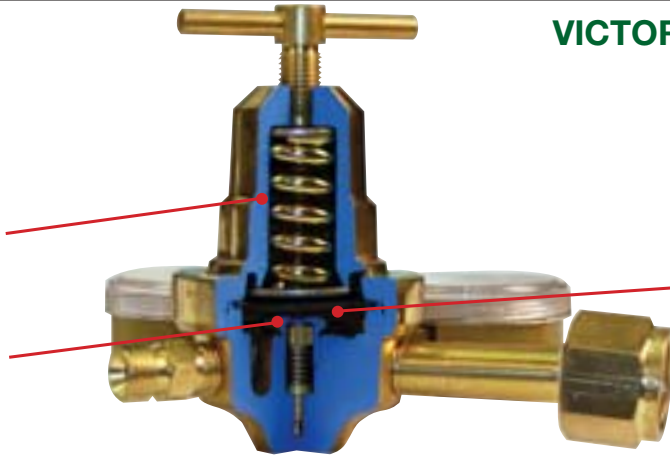

Every day since 1913, VICTOR has continued to earn its reputation as the premium designer and manufacturer of oxy fuel welding and cutting apparatus systems. Used around the world in the most extreme conditions, VICTOR regulators and torches are built to take the pressure with the durability features that set the industry standard.

## Heavy-Duty Design And Construction Features

## VICTOR CUTSKILL 250 REGULATOR

Long mechanical spring develops excellent performance

Soft seat – less prone to regulator creep or failure

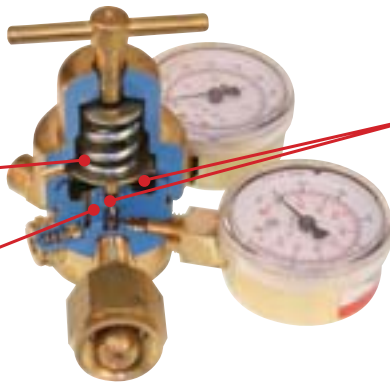

Large diaphragm – good seat to diaphragm ratio – less pressure rise

# COMPARE TO...

## SMITH EQUIPMENT TOUGH CUT REGULATOR

Short spring equates to increased pressure and flow drop during operation

Hard seat material is less forgiving than the soft seat design of Victor Cutskill

Small diaphragm. Seat to diaphragm ratio results in increased pressure rise.
