Dear Valued Thermadyne Distributor:

*Joseph F. Mueller, Jr.
Vice President, Americas Marketing*

The metals and transportation markets are struggling through a period of significant uncertainty. We continue to experience rising costs in these areas which require action.

As a result, effective February 15, 2008, Thermadyne will add a surcharge to a number of commodity sensitive Stooddy SKU's. As we have communicated in the past, this action is inclusive of all contract pricing, regardless of the date implemented and will be assessed at the time the order is placed, not shipped. We will post a list of products impacted on the Stooddy web site immediately.

Finally, due to the volatility of today's market, all surcharges are subject to change without notice. While we will continue to communicate any changes to you in a timely manner, information relative to surcharges will be posted on My Thermadyne and the Stooddy website (www.stooddy.com). If you are a distributor and do not have a user name and password for My Thermadyne, please contact webadmin@thermadyne.com for the name of the web administrator we have assigned to your organization.

We appreciate your patience and understanding as we move through these volatile times. Please feel free to contact your Stooddy Technical Sales Manager if you have any additional questions.

Respectfully,

Joseph F. Mueller Jr.
Vice President, Marketing-Americas
