

## New Product Marketing Update Bulletin

Q3 2007

> Find more information in the New Product section of [www.thermal-dynamics.com](http://www.thermal-dynamics.com) on these product updates

Thermal Dynamics® is proud to announce the latest addition to our automated plasma cutting family, the Auto-Cut 300.

The Auto-Cut 300 is a conventional plasma cutting system designed for end users engaged in the production cutting of materials up to 1-1/4". Competitively priced, this system features a low cost of operation and is ideal for customers who do not require precision plasma cut quality. While the Auto-Cut 300 is optimized for air plasma cutting of mild steel, the unit does offer best-in-class cut quality on stainless steel and aluminum when used in conjunction with our standard Water Mist Secondary (WMS™) feature.

The Auto-Cut 300 system offers metal fabricators quantifiable advantages that result in higher productivity and improved profitability. The prominent features of the system include:

- Exceptional Cut Quality
- 300 Amp Cutting Current for Faster Cutting Speeds
- Competitive Price
- Low Cost Operation and Ownership
- Speedlok™ allows you to quickly install and precisely lock cartridges for rapid process changes
- New MaximumLife® Parts for Even Greater Costs Savings and Longer Parts Life
- Water Mist Secondary Capability for Optimum Stainless and Aluminum Cutting

More detailed information can be found on the Auto-Cut 300 Brochure (Form Number 63-2713) or contact Customer Care at 866-279-2628 or [automation@thermadyne.com](mailto:automation@thermadyne.com).
